Lexy's story (the polluted trees)

Lexy and Cally went to the forest, looking for work. They had heard that people were needed to clean the trees. They found the manager and introduced themselves.

“So you want a job here? You can help us wash the trees every week – some of them are getting grimy from an unknown pollution, you see,” explained the manager. He showed them a complicated machine. “You can use this for the job – the Tree Washer 3000!”
