

Planning your Research:

Use the table (or a blank page) to plan out how you will collect relevant qualitative and quantitative data.

Learners deliver a presentation on a researched subject of their choice. In doing so, **they should use both quantitative and qualitative evidence**, and present personal conclusions.

Quantitative	Qualitative
<i>e.g. questionnaire using a Likert scale to gather data on body image</i>	<i>e.g. interview using open questions to gather data on women's experiences of misogyny</i>
